Ingrid,

I have reviewed most of the information provided and these are my thoughts:

* I tend to agree with the county's growth estimate based on current and local knowledge of population growth trends; placing us between the medium and high range estimates of the OFM.

* In regards to Orcas Island, have the OPAL communities and their impact to the population status by providing affordable housing and multiple living units been factored into the forecast for our island?

Thank you for the opportunity to provide comments,

Scott Williams, Fire Chief
Orcas Island Fire and Rescue
