Subject: Planning transparency and quality

Dear County Council, Planning Commission, Planners and other relevant decision makers

I have read a request made by a SJC citizen on 1/30/2001 located at

<http://www.doebay.net/forthcoming.html>

and I have read the Planning Commission finding dated October 19, 2001, located at

<http://www.doebay.net/SJC%20PC%20findings%20Oct%202001.pdf>

related to this formal request.

I write to request that you revisit and implement the Planning Commission's finding and make the information produced broadly available to the public prior to any substantive conversations, actions or hearings by DCD or the PC so that the citizens of SJC can, for the first time, have a clear and unambiguous picture of the status of the current CP.

I have perused the material describing the previous update to the CP, located at [doebay.net/appeal](http://doebay.net/appeal)

and am very concerned about both the fairness of the process by which the current CP has been constructed and the disturbing lack of consistency between the CP and the BOCC approved Vision Statement for SJC.

As the request and the PC findings were made 16 years ago, new data and newer methods of presenting that data, as well as expanded information related to the overall concept of full disclosure, should be included.

Cordially,

MS. MARTHA KRAMER AND DR. GREGORY KRAMER
