Subject: CP Update - Eastsound

Gentlepeople,

I want to recommend that the CP update, Transportation Element, include whatever it takes to extend the PUBLIC RIGHT OF WAY known as Bartel Road beginning at North Beach Road all the way through to Terrill's Beach Road.

The existing (public r.o.w.) of Bartel Road terminates about 1500 feet east of N. Beach Rd. and transitions to a private improved road extending to Bartwood Estates where it is presently terminated with a gate. East of this gate is a narrow private road which traverses a significant drainage way which runs to the north; the road terminates at Terrill's Beach Road.

The blockage is a serious negative in terms of public safety.

The drainage way is the natural flow northward from the large Eastsound Rural zone to the south...dealing with the consequences of this water flow is beyond the responsibilities and resources of a small group of private property owners...I claim it is a community issue which should be solved w/ community resources.

Fred
