Subject:	Request for Build Out Analysis

Inexpensive and powerful off the shelf software exists that would sit atop (be an extension of) SJC's GIS data; this software generates easy to understand graphics and information and includes a capability to generate a Build out analysis.

The company producing the software is

http://communityviz.city-explained.com/index.html

and the software with many explanatory videos and materials is at

http://communityviz.city-explained.com/communityviz/index.html

I request that SJC immediately investigate, purchase, train staff along with interested citizens in the use and functionality of this software and produce a Build Out Analysis to be made widely available for public awareness and public use (perhaps through workshops)

In conversations with Bill Watson, I understood him to say that he would request DCD to produce a Build Out Analysis. The tool is here, the staff is competent, the data exists, the price is affordable and the need is essential.

Please acknowledge receipt of this communication and advise as to county's willingness to proceed with this step.

Thanks

Joe Symons
