**Subject:** Standalone Ag Section

Dear Members of the SJC Planning Commission,

It was brought to my attention that the comprehensive plan does not have a standalone section dedicated to agriculture and I believe it should. This section could consolidate and emphasize various references to agriculture elsewhere, reflect community comments and sentiments regarding the importance of agriculture here, ensure a long-term ag-friendly environment for budding farmers considering major investments, and thereby hopefully prevent this sector of the island economy and culture from disappearing. Small-scale farming today needs community and local government support to compete with agribusinesses.

Thank you for considering this change,

Heike Uhlig
