**Subject:** A place for farming and agriculture in the Comp Plan

Hello members of the SJC Planning Commission,

I am asking that you consider the addition a section dedicated to agriculture in the Comp Plan Vision statement.

We speak often of the agricultural nature of our islands, of our farming heritage and it's contribution to our quality of life, both aesthetically and economically. The complex nature of what constitutes agricultural land and of the economic viability and resiliency of farming in our islands, warrants more than the current references in the Vision Statement. A section dedicated to agriculture would recognize the importance of this key part of our San Juan County identity and assure it is given the attention it warrants.

Thank you for your consideration,

Kai Sanburn
