Section 4.4 should address or at least reference where off-site waste water is covered (ie Town of Friday Harbor and any other community waste water sites).

Policy #8 "Explore" is verb without sufficient action or direction to be listed with your policies (It is a step or two below the word "encourage" in Policy #7). How about something like: Review and suggest revision of building codes to incorporate a separate gray water system requirements as part of any on-site wastewater system for new construction.
