Gentlepeople,

re: Sewage Treatment Facilities

The narratives describing the existing systems would be more informative if there were a clear reference to the GMA and its restrictions for sewage treatment to be limited to service within UGAs, and spell out the special circumstances which must be present in order to extend lines beyond UGA boundaries, irrespective of pre-GMA service area boundaries.

Lack of maps showing the extent of existing service lines is a serious omission and should be a part of any respectable capital facilities plan as well as any plan which purports to comply with the GMA.

Cordially,

Fred Klein
