We would like to state our disapproval of any zoning change to Eagle Crest Lots 23 and 21. They currently provide insufficient buffer of quarry operations. If they were rezoned there would be zero buffer to residential properties adjacent. Lot 23 has been an active residence for over 40 years with only short vacancies. Lot 21 is currently in use as a residence.

We would not be in agreement with anything that would extend the footprint of the quarry beyond its current size. Mining has already encroached upon neighboring lots. We would suggest that the best future for this land would be to remediate it to residential use.
