

Reasons that Egg Lake Quarry should not be given mineral status.. (No.1) If given Mineral status, there will be an application for Expansion of the quarry shortly afterwards, The property has not been continuously used as a quarry as a neighbor I would have heard the noise. If the owner believes the property has been continuously used , please submit all documentation and tax records and volume books to prove continuous use. Just saying It has been continuously used Does not make it true. The property has been vacant and/or abandoned for many years at a time. .. (No. 2).. A Quarry is a High Heavy Industrial use of property in a Rural residential use area..... (No. 3) When the quarry property was for sale last time I thought a nice house would be built there overlooking egg lake since a building site had been created I live 4 or 5 properties away from the quarry and can hear it in the summer all day and I have to put on a radio to work in the garden so I don't hear it. Grinding rock and the beep beep beep of trucks backing up And I have to listen to the quarry making noise And the shooting of guns on Sunday afternoons. (If my name needs to be known for this statement to be accepted please let me know and I will provide then, but I would prefer to remain anonymous)
