

Sewage documentation requirements

If your project involves...	...then provide the following documentation
New construction served by an on-site sewage system (OSS)	Include first page of approved OSS design showing that it has been approved or that it has been submitted and has a Health & Community Services 'received' stamp.
New construction served by a public sewer system	Include public sewer availability letter from the utility provider.
Any building permit on a property utilizing an existing, installed OSS	A current inspection must be on file with Health prior to building permit issuance. Contact a licensed wastewater inspector to complete the inspection and submit to Health. Gravity systems require an inspection every 3 years. All other systems require an inspection annually.
